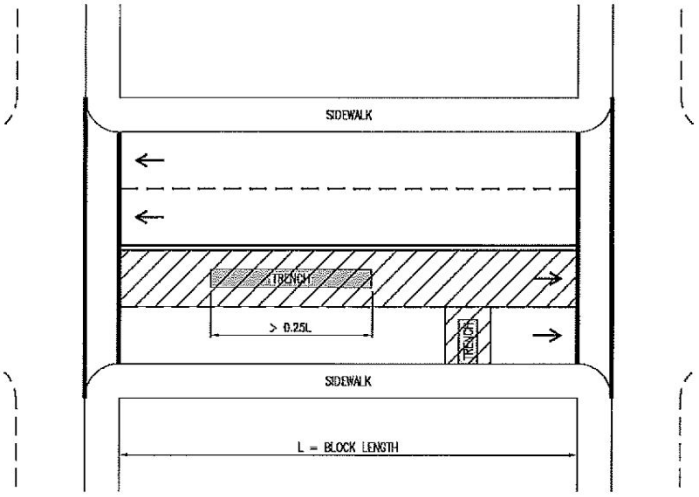
172 Attachment 1

Borough of Tyrone

APPENDIX for Street Openings
[Added 2-9-2026 by Ord. No. 1496]

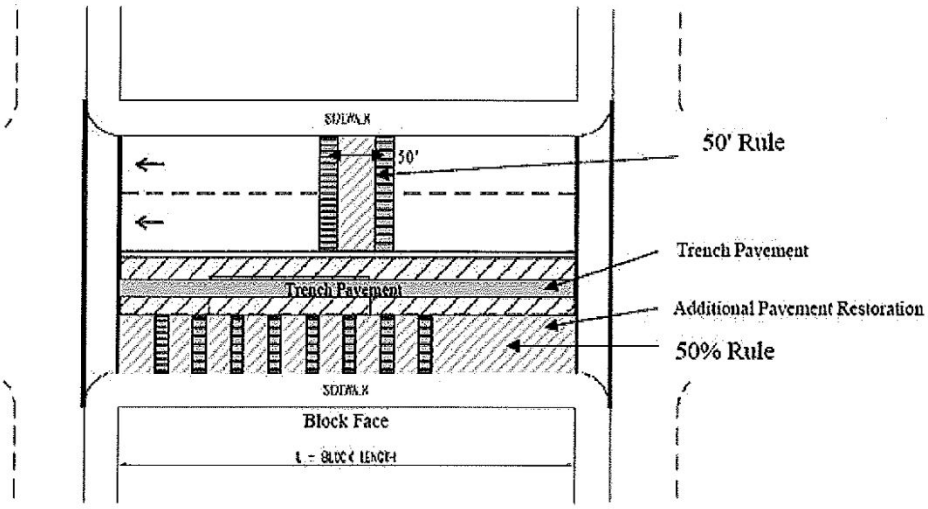
25 Percent Rule

For any trench that exceeds 25% of the length of the block restoration will include base repair of the trench and milling and paving of all affected lanes for the entire length of the block.



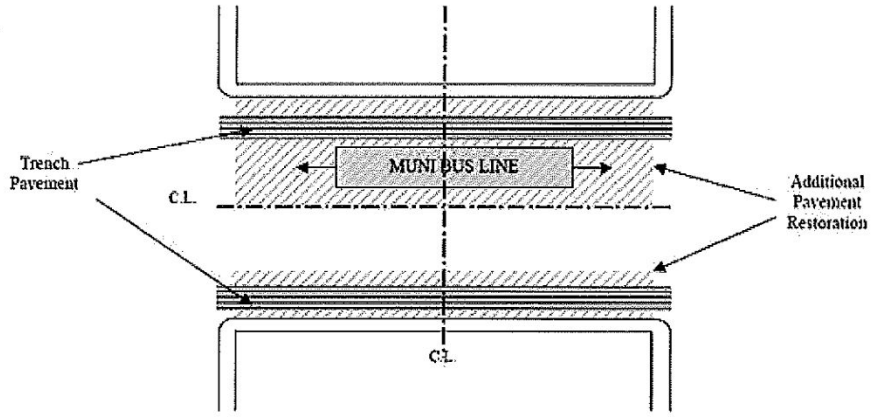
50 Percent Rule

Restoration shall be contiguous for all affected lanes when laterals or holes are less than 50 ft. apart. In addition, the 50 percent rule shall also apply for all affected lanes for the entire block whenever there are 8 or more laterals or 50% or more of the services are excavated.



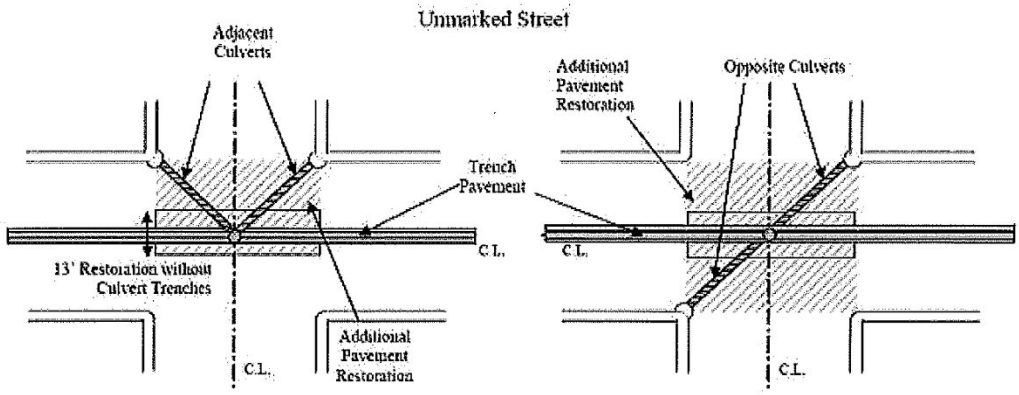
Collector and Other higher volume routes

For any bus routes, snow emergency routes, and other collector routes restoration will extend to the center line of the street.



Intersection Quadrants

Adjacent quadrants in intersections that are excavated require full restoration of the adjacent quadrants or one half of the intersection. Work done in three quadrants or Non-adjacent quadrants require restoration of the entire intersection.



NOTE: If a trench runs parallel to and within 4' of a curb, and the 25 f and 50 foot rules do not apply, the trench shall be paved to the curb.
